

1896. The "4 Attis" Surcharges.4 Attis on 12 Attis.Large Roman Setting.Further surcharged with a Siamese figure 9.

The meaning of this extraordinary variety is quite unknown; it was obtained from among a mass of mixed stamps, and bears every mark of being genuine. One of the Arabic figures 4 is overprinted with the additional figure no less than three times, while the other 4 is doubly surcharged. In the case of the Siamese overprint, the numeral is in each case surcharged once. All the additional figures of the second surcharge were added by apparently the same handstamp.
